About FIT Competition 2026

FIT Competition, or Faculty of Information Technology Competition, is an annual technology competition organized by the Computer Science Student Association at the Faculty of Information Technology, Satya Wacana Christian University

The FIT Competition 2026 is held under the theme **“Digital Impact for Humanitarian Response and Global Well-Being”**. This competition aims to foster a positive competitive spirit and encourage creativity and ideas in the field of computer science that can raise public awareness of the environment through the integration of technology in urban environments.

The main event of FIT Competition will be held from July 7 - 9, 2026 at the Faculty of Information Technology, Satya Wacana Christian University, Salatiga, Central Java, Indonesia.

Final Round Introduction

We express our gratitude to God Almighty, for His grace and guidance have enabled FIT Competition 2026 to successfully reach the Final Round. We congratulate all teams who have been declared finalists in the Data Science Category. This achievement is the result of a rigorous selection process, hard work, creativity, and commitment from each team to develop the best data-driven solutions aligned with the chosen theme.

The Final Round is the final stage of the 2026 FIT Competition and is designed to comprehensively test the finalists' abilities. At this stage, participants are judged not only on the accuracy of their models but also on aspects of their Data Science methodology, depth of data analysis, precision of humanitarian solutions, teamwork, and the ability to produce and present their scientific work to a panel of judges.

The Final Round will be held on-site at the Faculty of Information Technology, Satya Wacana Christian University (UKSW), Salatiga, Central Java. Each finalist is expected to prepare themselves well and understand all the implementation mechanisms through the official references in this guidebook.

Theme, Track, and Scope

The FIT Competition 2026 theme is “Digital Impact for Humanitarian Response and Global Well-Being.” This theme highlights the vital role of technology and data processing in delivering relevant, adaptive, and impactful solutions to address humanitarian needs and promote the well-being of the global community.

In the Final Round, each team must implement a solution aligned with the proposal submitted in the Preliminary Round, particularly regarding the selected track and the primary objective of the chosen humanitarian solution.

To reflect the complexity of real-world data challenges in the industry and humanitarian sector, the organizing committee provides several variations of dataset types for each competition track. Each track will be equipped with 2 to 3 different dataset options, ranging from standard tabular formats to multimodal datasets (a combination of tabular + text or other data types).

Each team is given full freedom to choose the dataset they deem most relevant, effective, and suitable for the characteristics of the solution in your initial proposal. Technical adjustments to the model are permitted as long as they do not alter the core concept of the proposed humanitarian solution.

As a way of recognizing the technical challenges involved, teams that choose and are able to effectively optimize the use of multimodal datasets will receive additional scoring weight from the judging panel. However, the organizers emphasize that the primary focus of the evaluation remains on the accuracy of the analysis, the depth of insights, and the alignment of the solution with the problem at hand. Therefore, the use of standard tabular datasets remains a very strong and competitive option if it is deemed more objective and capable of producing a more robust solution for the selected track.

Competition Timeline

Online technical meeting details will be announced through each team's liaison officer.

Re-registration

This process is designed to ensure that participants are prepared to take part in the entire series of activities in the Final Round.

1. All teams that have qualified for the 2026 FIT Competition Finals must re-register to confirm their participation in the final stage of the competition. [\[Link\]](#)
2. All finalist teams must complete the re-registration process no later than June 28, 2026, at 11:59 PM WIB. Teams that do not re-register by the specified deadline will be considered to have withdrawn from the competition.
3. Setiap tim finalis wajib membaca, memahami, menyetujui, dan melengkapi Surat Pernyataan Tanggung Jawab dan Kepatuhan Perangkat Peserta sebagai bagian dari proses pendaftaran ulang Babak Final FIT Competition 2026. Template surat pernyataan dapat diakses melalui tautan berikut: [\[Link\]](#)
4. As part of the re-registration process, each finalist team is required to pay a participation fee of Rp300,000 (three hundred thousand rupiah), payable via Bank : **BRI** ; Account Number : **008101079777507** ; On behalf of : **Michael Andreas Putra Yusevi**
5. Payment must be uploaded via the re-registration form as part of the participant verification process.
6. Fees that have been paid are non-refundable under any circumstances, unless the organizing committee has established a specific policy to the contrary.

If participants encounter any issues during the re-registration process, they may contact the official FIT Competition 2026 contact person listed at the end of this guidebook.

Rules and Regulations

1. Attendance and Identification

- Participants must arrive on time and re-register before participating in the activities.
- Participants who arrive late without official confirmation may be subject to penalties.
- All team members must participate in the entire Final Round, except under specific circumstances approved by the organizing committee.
- Participants must wear neat and modest attire, and must bring and wear their respective university uniforms and use the identification badge (cocard) provided by the organizing committee while in the event area.
- Identification badges may not be transferred to other parties.

2. Ethics and Order

Participants must maintain peace, order, and cleanliness in the event area, and behave politely toward the organizing committee, the judging panel, and other participants. Participants are prohibited from disrupting other teams during the session, and are prohibited from bringing dangerous objects or prohibited items into the event area. For international participants, monitoring will be conducted online for 12 hours. Any suspicious activity outside the camera's view or a loss of video connection without confirmation may affect the assessment of the team's objectivity and integrity.

Rules and Regulations

3. Prohibitions During the Finals

- Leaving the competition room during the Live Coding session without the organizers' permission.
- Accepting outside assistance in any form.
- Communicate with external parties to obtain guidance, debugging assistance, design input, code, or solutions.
- The use of ready-made source code, project templates, AI agents, or other unauthorized tools.
- Engaging in actions that harm or cheat other participants.

4. Penalties

Any violation may result in penalties commensurate with its severity, ranging from a warning, point deduction, or invalidation of results, to disqualification. The decisions of the judging panel and the organizing committee are final and binding.

Implementation Mechanisms

a. On-site Implementation Mechanism

FIT Competition 2026 Finals will be offline (on-site) for participants who are in Indonesia and consist of several stages that all finalist teams must complete.

Implementation Process

- 1. Registration & Device Check:** Physical identity verification for the teams and the distribution of official ChatGPT accounts by the organizing committee will take place approximately 15–30 minutes before the Live Coding session begins.
- 2. Live Modeling & Analysis Session (12 Hours):** Teams independently complete the entire process of data processing, Machine Learning/Deep Learning modeling, comparative analysis, and preparation of presentation slides within a full 12-hour timeframe without external intervention.
- 3. Submission of Results:** Teams submit their final work, which consists of coding notebook files and presentation slides, exactly when the time limit is up.
- 4. Presentation & Model Demonstration:** Each team presents their methodology and demonstrates the stability of their model's inferences before the judging panel.
- 5. Q&A and Evaluation:** A critical discussion session with the judging panel regarding technical aspects of the data, code verification, and model evaluation metrics.

All participants are expected to follow the entire series of activities according to the schedule and regulations set by the organizing committee.

Implementation Mechanisms

b. Online Implementation Mechanism (International Participants)

FIT Competition 2026 Finals will allow international participants to compete online and will consist of several stages that all finalist teams must complete.

Implementation Process

- 1. Registration & Monitoring Preparation:** Verification of the team's virtual identity and handover of the official AI (ChatGPT) account from the organizing committee before the competition begins. There will be no physical device inspection.
- 2. Live Modeling & Analysis Session (12 Hours):** Teams will independently carry out the entire process, from data processing, machine learning/deep learning modeling, and comparative analysis to preparing presentation slides, within the full 12-hour duration without any outside intervention. The entire session will be monitored in real-time by the organizing committee via Google Meet. Specifically for international participants, the monitoring mechanism requires participants to keep their cameras on (on-cam), showing their faces and work areas, and to share their screens continuously throughout the competition.
- 3. Submission of Results:** Teams must submit their final deliverables, consisting of the coding notebook file and presentation slides, virtually (via the provided platform) exactly when the time limit is up.
- 4. Presentation & Model Demonstration:** Each team will present their methodology and demonstrate the stability of their model's inference before the panel of judges online via Google Meet.
- 5. Q&A & Evaluation:** A critical discussion session with the panel of judges (via Google Meet) regarding the technical aspects of the data, code verification, and model evaluation metrics.

All participants are expected to follow the entire series of events in accordance with the schedule and monitoring regulations established by the committee.

Live Coding Regulations

1. Competition Dataset Distribution

- **Track Selection:** The selection of dataset tracks is not done by lottery. Each finalist team is entitled to choose their own dataset track based on their ranking in the Qualifying Round, starting with the team with the highest score and proceeding to the team with the lowest score.
- **Dataset Distribution Time:** The official competition dataset will be distributed to each team shortly before the Live Coding session begins.
- **Track Exclusivity:** To ensure a diverse range of humanitarian solutions, each competition track will be limited to a maximum of 2 (two) teams.

2. Modeling from Scratch

- Data exploration, model building, and analysis must begin from the initial (empty) state when the Live Modeling session officially begins.
- Participants are strictly prohibited from bringing or using pre-written source code, pre-trained models (custom pre-trained weights), or ready-made projects prepared before the competition begins.
- The use of basic architectures from standard libraries is permitted. However, the entire pre-processing pipeline, feature engineering, model architecture selection, and evaluation process must be implemented during the competition.

Live Coding Regulations

3. Computing, Devices, and Internet Access

- Each team member is allowed to use a maximum of 1 (one) laptop per person.
- Participants are fully responsible for the technical performance of their laptops, chargers, and independent computing needs.
- The organizing committee allows the use of cloud-computing platforms such as Google Colab or local Jupyter Notebooks to facilitate participants' model training processes.
- Internet access is permitted for accessing Google Colab, downloading libraries/dependencies/package managers, reading official documentation, or connecting to a database if necessary.
- Participants are prohibited from using the internet to communicate with outside parties (instant messaging, social media, active discussion forums) or from downloading complete code or solutions belonging to others from public repositories.

4. Libraries, Dependencies, and Legality

- Participants are permitted to use open-source libraries, packages, and dependencies that are legal and commonly used in the data science ecosystem.
- Participants are fully responsible for the legality, licensing, and functional understanding of any external components integrated into their code.

5. Assistance Prohibitions and Device Quarantine

- All work must be performed by officially registered team members. Neither academic advisors nor outside parties are permitted to enter the competition room or provide technical assistance.
- The organizing committee has the right to conduct an on-site inspection of the devices (laptops) used by participants if there are strong indications or suspicions of cheating, data manipulation, or violations of the competition rules.

AI Usage Regulations

1. Instruction-Based AI Utilization

- Each finalist team is required to use AI as a primary supporting tool to simulate the work efficiency of modern industries. AI can be utilized to facilitate function design ideation, bug hunting (debugging error codes), explanations of algorithmic theory, and computational efficiency optimization.
- **Official Platform:** ChatGPT.
- **Account Provision:** To ensure transparency, preserve chat history, and facilitate monitoring, each team will be provided with 1 (one) new ChatGPT account specifically created by the organizing committee, which will be shared approximately 15–30 minutes before the event begins.
- AI may only be used interactively based on contextual and manual instructions from the participants (manual prompting).

2. Strict Prohibition of Automated AI Agents

- Participants are strictly prohibited from using AI Agents or automated CLI modules that can independently execute code writing, data cleaning, or model building without step-by-step instructions from a human. Prohibited tools include, but are not limited to: Codex, Claude Code, Gemini CLI, or similar automation extensions.

3. Responsibility for AI Outputs

- Outputs generated by ChatGPT cannot be used as a defense for coding logic errors, model bias, data misinterpretation, or plagiarism. Participants must independently curate and fully master every line of code generated with AI assistance. An inability to explain the code's functionality before the panel of judges will significantly reduce the evaluation score.

AI Usage Regulations

4. Transparency and Ethics in AI Usage

- **Transparency Obligation:** All finalists are required to uphold absolute transparency in their modeling workflows. If there are code blocks, complex logic functions, or text/tabular processing architectures obtained through ChatGPT's assistance, participants must be open and willing to honestly explain the origin of such code to the panel of judges during both the presentation and Q&A sessions.
- **Academic and Professional Ethics:** AI must be positioned purely as a collaborative assistant, not as a replacement for the participants' critical thinking process. Participants are strictly prohibited from manipulating AI to engineer or forge model evaluation metrics (such as intentional data leakage through AI), engaging in intellectual plagiarism, or copying code that violates external copyrights. Any form of dishonesty in utilizing this technology will have an immediate and fatal impact on the team's ethics evaluation.

Live Coding Results Submission

1. Submission Deadline

Submission must be completed immediately after the Live Coding session is officially declared closed by the committee. Once the time expires, participants are not permitted to make any changes, additions, deletions, or edits to their developed results. Any late submission without an acceptable reason may affect the evaluation.

2. Submission Format

Each finalist team in the Data Science category is required to submit only 2 (two) main types of files:

- **Google Colab File (.ipynb):** Contains the complete coding documentation from start to finish, covering Exploratory Data Analysis (EDA), graphical visualization, data cleaning, handling missing values, model design, and model performance evaluation. The code must be clean, include explanatory comments, and be reproducible.
- **Presentation Slides (.pdf):** A presentation file based on the official FIT Competition 2026 template will be used during the judging session. The official FIT Competition 2026 template will be provided before the Live Coding session begins.

3. Responsibilities & Inspections

The team is fully responsible for the completeness, integrity, and readability of the submitted work, and must ensure that the application runs as instructed. Corrupted files, failed builds, missing dependencies, or unclear instructions may affect the final evaluation. The organizing committee and the judging panel reserve the right to verify the completeness of the submitted work and determine the validity of the submission.

Presentation, Demonstration & Q&A

1. Judging Time Allocation

Each team will have a total of 25 minutes in the judging room, divided as follows:

- Presentation & Coding Demonstration Session: 10 Minutes
- Critical Question and Answer (Q&A) Session with Judges: 15 Minutes

2. Scientific Reference Obligation (Journals)

Within the presentation slides, each team is required to include a minimum of 3 (three) scientific journal references as a theoretical foundation or research methodology comparison for their chosen humanitarian data handling model. The citation style is optional, as long as it remains consistent.

3. Presentation Content Scope

The material delivered during the presentation must include:

- Background on the humanitarian issue relevance to the research track.
- Methodological approach to handling multimodal data characteristics.
- Supporting visualizations, such as data distribution plots (EDA), feature correlations, and model performance/evaluation plots.
- Data model architecture, evaluation metrics achieved, technical challenges, and limitations of the developed model.
- A list of references including at least 3 supporting scientific journals.

Final Round Scoring System

The final evaluation for the Final Round is based on the accumulated percentage of two main components: the Python Notebook (40%) and the Presentation (60%). The detailed evaluation criteria are as follows:

Python Notebook (40%) :

1. Data Visualization and Understanding (10%)

The capability to explore data, recognize initial patterns, and the quality of graphical visualizations generated directly from the dataset.

2. Dataset Pre-processing Technique Accuracy (10%)

Accuracy in data pre-processing, including missing value handling, tokenization, feature engineering, and data cleaning.

3. Model Performance & Evaluation Metrics (20%)

The final performance results of the model, cleanliness of the code structure, and the stability of the model during execution.

Presentation (60%) :

1. Analysis Quality & Solution Delivery (20%)

The sharpness of the analysis regarding the background of the humanitarian problem (track) and how effectively the developed model's output provides a rational, impactful, and real-world solution.

2. Presentation Skills & Material Mastery (20%)

The team's comprehensive mastery of the material, presentation fluency, and the ability to explain complex technical methodologies using structured, proper, and easily understood language.

3. Attitude & Answering Capability (20%)

The team's professionalism, division of tasks during the presentation, emotional composure, and the accuracy of scientific arguments when responding to critical questions from the panel of judges.

Accommodation & Consumption Terms

1. Transportation & Accommodation

These rules apply to the finalists and one (1) advisor from each team.

- Transportation to Salatiga: covered by each team.
- Accommodation while in Salatiga: covered by each team. The organizing committee will pick up participants from the nearest station (Semarang).
- Local transportation from/to accommodation to the activity location: provided by the committee according to regulations.
- Finalists are required to notify the committee's point of contact regarding their accommodation location for pick-up and drop-off purposes.
- Finalists who bring private vehicles are required to notify the contact person.

2. Meals

Meals during the event will be provided by the organizing committee. Participants with special dietary needs may indicate this on the form or contact the organizing committee.

3. Accommodation Form

- Pick-up Form : [[Link](#)]
- Return Form : [[Link](#)]

Form submissions must be completed by the deadline, which will be communicated via the official finalist channels.

4. Accommodation Contact Person

- Salsa — +62 838-3888-7380
- Henri — +62 881-0118-97388

The committee will hold an online technical meeting prior to the Final Round to discuss attendance procedures and final preparations. Details regarding the time and meeting link will be distributed via the official finalist group.

Event Rundown

TIME	Duration	Day 1 (7 July 2026)	Venue
07:00 AM - 08:30 AM	90 Minutes	Participant Re-registration + Snack Distribution	6th Floor
08:30 AM - 08:40 AM	10 Minutes	Opening & MC Greeting	Auditorium FTI UKSW & FTI 400
08:40 AM - 08:45 AM	5 Minutes	Opening Prayer	
08:45 AM - 08:55 AM	10 Minutes	Singing Indonesia Raya + UKSW Hymn + FTI March	
08:55 AM - 09:05 AM	10 Minutes	Welcome Speech by Committee Chair	
09:05 AM - 09:10 AM	5 Minutes	Welcome Speech by SMF Chair	
09:10 AM - 09:15 AM	5 Minutes	Welcome Speech by Faculty Board	
09:15 AM - 09:30 AM	15 Minutes	Entertainment	
09:30 AM - 10:15 AM	45 Minutes	Seminar Session 1	
10:15 AM - 10:30 AM	15 Minutes	Q&A Session – Seminar 1	
10:30 AM - 11:00 AM	30 Minutes	Seminar Session 2	
11:00 AM - 11:15 AM	15 Minutes	Q&A Session – Seminar 2	
11:15 AM - 11:20 AM	5 Minutes	Plaque Handover + Group Photo	
11:20 AM - 11:25 AM	5 Minutes	Closing Prayer	
11:25 AM - 12:25 PM	60 Minutes	Technical Meeting + Equipment Check	Auditorium FTI UKSW & FTI 400
12:25 PM - 12:55 PM	30 Minutes	Travel from FTI UKSW to Salatiga Eco Park	FTI UKSW & Salatiga Eco Park
12:55 PM - 01:55 PM	60 Minutes	Group Lunch	Salatiga Eco Park
01:55 PM - 04:55 PM	180 Minutes	Tour and Free time	
04:55 PM - 05:25 PM	30 Minutes	Participants Return to Accommodation	Respective Accommodations

TIME	Duration	Day 1 (7 July 2026)	Venue
05:00 AM - 06:00 AM	60 Minutes	Participant + Committee Preparation	Respective Accommodations
06:00 AM - 07:30 AM	90 Minutes	Participants Proceed to FTI + Snack Distribution	FTI UKSW
07:30 AM - 08:00 AM	30 Minutes	Competition Opening + Competition Rules Reading	FTI 120, 400, 455, 454
08:00 AM - 08:00 PM	720 Minutes	Competition	
08:00 PM - 08:30 PM	30 Minutes	Participants Return to Accommodation	Respective Accommodations

Event Rundown

TIME	Duration	Day 1 (7 July 2026)	Venue
06:00 AM - 07:00 AM	60 Minutes	Participant + Committee Preparation	Respective Accommodations
07:00 AM - 07:30 AM	30 Minutes	Accommodation Check-Out	
07:30 AM - 08:30 AM	60 Minutes	Participants & Judges Proceed to FTI + Snack Distribution	FTI UKSW
08:30 AM - 08:40 AM	10 Minutes	Presentation Preparation and Briefing	Auditorium FTI UKSW, FTI 120, FTI 333, FTI 400
08:40 AM - 11:10 AM	150 Minutes	Project Presentation	
11:10 AM - 12:40 PM	90 Minutes	Lunch Break + Seminar Participant Re-registration	2nd Floor (Canteen)
12:40 PM - 01:10 PM	30 Minutes	Cisco Sharing Session	Auditorium FTI UKSW
01:10 PM - 01:40 PM	30 Minutes	Telkom Sharing Session	
01:40 PM - 02:35 PM	55 Minutes	Winner Announcement and Trophy Presentation	
02:35 PM - 02:50 PM	15 Minutes	Closing Ceremony	
02:50 PM - 03:20 PM	30 Minutes	Participants Departure	

Frequently Asked Questions (FAQ)

1. Are we allowed to use pre-trained models from home?

No. All code for data cleaning, exploration, and model training or fitting must be written from scratch in the Notebook file during the 12-hour session.

2. Are we allowed to use Google Colab Pro or an external GPU?

To ensure equality and fairness among participants, the only cloud platform permitted is the free version of Google Colab. The use of Google Colab Pro or additional hardware, such as external GPUs, is not permitted. As for physical devices, each participant is still limited to using a maximum of one laptop.

3. What files must we submit at the end of the 12-hour session?

Only 2 files: A clean and well-structured Google Colab code document (.ipynb) and a Presentation Slide file (.pdf). You do not need to submit a written technical report or .csv prediction output files.

4. Do participants provide their own ChatGPT accounts?

No. The organizing committee will provide one new ChatGPT account specifically for each finalist team when the re-registration session begins to ensure transparency in monitoring.

5. Is it permitted to use external datasets?

Participants are required to primarily use the official datasets provided by the organizing committee in accordance with their chosen track. The use of external datasets is permitted only as supplementary data (e.g., for transfer learning or feature enrichment), provided that the datasets are open-source, legally valid, and clearly cited in the presentation slide.

Total Prize

Data Science Category	
1st	IDR 10.000.000
2nd	IDR 7.500.000
3rd	IDR 5.000.000
4th	IDR 800.000
5th	IDR 550.000
6th	IDR 300.000
